Tips for businesses with multiple locations or remote locations

Get free supplies for all your locations. Alaska USA will provide you with as many depository access cards and free depository kits as you need. You will probably want at least one for each location. Each depository kit includes detailed instructions for making deposits.

Remote Business Deposit. Alaska USA gives eligible business members the ability to make check deposits directly from their business location. This is done using a personal computer and scanning device. Checks are tallied and scanned, converted to electronic items, and transmitted to Alaska USA for review and credit to the account.
